

OVERVIEW

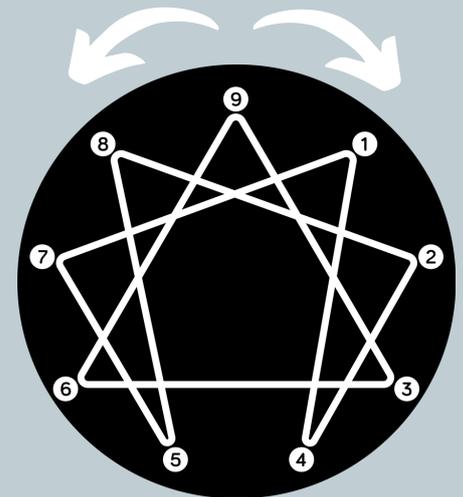

Wings are the personality types on either side of your core type. For instance, if you identify as a Type 9, then your wings will be 8 and 1 (ie. You cannot be a 9 with a 5 wing).

Your wings will 'flavour' your core type, like salt and pepper. That is, the character traits of those other types will *influence* the way that you behave and engage with life. You may use one wing more than the other, or they could be quite equal.

The *motivations* behind your thoughts, feelings and behaviour will always match your core type, but your wings are what gives your personality and approach to life a bit more *dimension*.

Although one wing may be dominant, you still have access to both wings and can tap into the strengths of the other wing depending on the circumstance. For example, you may lean into different wings when you're at home versus at work.

If you are a 9 with a 1 wing, you'd write it as 9w1.
